| | |
| 2:15 - 2:45 | Street Dept./Water Fund - Rick Jones |

The economic engine of Vermont-

Village Manager's Office

MEMORANDUM

TO: Village Trustees

FROM: Patrick Scheidel, Village Manager

DATE: December 20, 2016

SUBJECT: FYE18 General Fund Budget Transmittal

PROPOSED FYE17 BUDGET- SUMMARY OF ISSUES

The Managers' proposed FYE18 budget is a request for funds to continue providing services to the Village residents at the current level with more costs to be shared with the Town. The additional costs to be transferred to the Town are the Finance Director and IT services. The proposed budget shows an overall decrease of .7% due to these transfers and also the discontinuing of the half penny for the Fire Truck Ladder note.

The proposed budget is \$3,923,872 which is a decrease of \$29,202 (-0.7%) from the FYE17 budget. The change from the FYE17 budget is made up of the following:

| Salaries | \$(52,453) |
|-------------------------------|---------------|
| Consultant for Manager search | \$17,000 |
| Computer Expenses | (13,000) |
| Street Lights | (9,948) |
| Winter Maintenance | 5,000 |
| Pavement Maintenance | 10,000 |
| Capital Contributions | (19,379) |
| Health and Other Insurances | 9,258 |
| Other increases & decreases | <u>24,320</u> |
| Decrease in Budget | \$(29,202) |

This budget follows the model adopted in FYE16 where the Town pays all of the Street Department. Our grand list assumptions are a 1% increase in non-Global Foundries grand list and no change in Global Foundries grand list value which was reduced in FYE17. With these assumptions, the Village tax rate is estimated to be \$.226, a decrease of 1.27 %.

PERSONNEL COSTS

The following is a list of the percentage personnel costs represent of individual departmental budgets (departments that have personnel) and the percentage personnel costs comprise of the total General Fund Budget:

| Administration | 76% |
|-----------------------|-----|
| Economic Development | 66% |
| Fire | 61% |
| Library | 76% |
| Community Development | 81% |

Proposed FYE18 Budget- Summary of Issues

Street 34% Total General Fund 47%

AREAS OF GREATEST CHANGE IN SERVICE OR COST ARE:

- 1) Salaries, Health Insurance and other Insurances contribute a substantial amount to the budget decrease due to the transfer of the Finance Director costs to the Town of Essex.
- 2) Capital Contributions decrease due to the elimination of the half penny for the ladder truck.
- 3) Other professional services in Administration increase for the Manager search.
- 4) Computer Expenses decrease due to transfer of IT costs to the Town of Essex.

Budget Challenges

Budget Goals

Our goal was an inflationary level of increase. Due to the transfer of some costs to the Town of Essex we were able to keep the budget increase less than inflation rate.

New Services

The Communications Assistant in Economic Development is proposed to be upgraded to a Communications Officer position shared by the Village and Town.

Capital Budgets Funding

The Capital Budget contribution is increased by 7.5%. Projects proposed for FYE18 are Hillcrest Sidewalks, Greenwood Ave. Drainage, Main St. Pedestrian Bridge, and the construction of the Crescent Connector. These projects have been ranked highest priority by the Capital Committee. A new Village server was deleted from the plan as the Town will be providing a server on their system.

The Rolling Stock contribution increases by \$10,000 each year. Vehicles planned for purchase include a Sidewalk Plow and a Fire Pumper. The Trustees have already approved the purchase of the Pierce Manufacturing Fire Truck. The Rolling Stock Plan includes taking out a \$150,000 note to complete the Fire Truck purchase.

Combined Service Initiatives

- The Town budget includes Public Works Administration for the Village Street Department.
- A Communications Plan for Shared Public Works Management has been implemented.
- The handling of requests for service/complaints for Shared Public Works Management has been implemented..
- The Village and Town Finance Departments have combined services in several areas and are sharing a Finance Director in the Town office
- Accounts Payable is a shared Function.
- Village payroll is on the Town System
- The TGIA group is moving forward
- The Finance Director position is proposed to be paid 60% by the Town General Fund, 20% by Village Utilities and 20% by Town Utilities. Finance Director will become a Town employee.

Proposed FYE18 Budget- Summary of Issues

- Village and Town will use the services of the Town IT Department. Eliminates need for new Village server
- Village and Town will share a Communications Officer

Grant Activity

Grants that are currently under Management

| Crescent Connector | \$4,500,000 |
|------------------------------------|-------------|
| Pearl Street Missing Link Sidewalk | \$2,120,000 |

Total \$6,620,000

| | | | | | | |

GENERAL FUND REVENUES - \$3,923,872

Represents an overall decrease of \$29,202 or -0.7%

Areas of significant change to the Revenue Budget are as follows:

Acct # Description

Unrestricted Fund Balance - (+/-\$0) In the past 5 budgets the Village has reduced the tax rate by using a small amount of fund balance. We propose to discontinue this as our unassigned fund balance has dropped. Following the transfer to the Building Maintenance Fund the percentage fund balance is of the FYE17 budget is 8.1%. The Trustees are allowed to maintain an unassigned fund balance of 10%.

39154.000-39156.000 – Enterprise Funds Service Fees (-\$52,350) – with the Transfer of the Finance Director salary and benefits the amount paid by the Enterprise Funds to the General Fund has decreased. (The Enterprise Funds will continue to pay 20% of the Finance Director's salary and Benefits to the Town General Fund.)

Farmers Market Reimbusement – (-\$4,575) The Village of Essex Junction is paying the full cost of the Farmers Market Manager. There is no longer reimbursement.

TRANSFERS & MISC EXPENDITURES - \$564,206

Represents an overall decrease of \$19,379 or -3%
This cost center is for Transfers to other funds and reserves

Areas to note:

Acct # Description

- **49100.030** Capital Fund Contribution (+\$20,621) A 5% increase in the cost of Capital Fund projects is assumed and the contribution from the General Fund increase was changed to 7.5% in FYE16 to increase the amount available for projects.
- 49100.031 Rolling Stock Fund Contribution (+\$10,000) We have increased this line item to keep up with the escalating cost of purchasing vehicles and equipment. The Rolling Stock replacement plan assumes a yearly increase of 3% for most vehicles and 5% for Fire trucks in our Rolling Stock Plan. We have a schedule we try to follow that outlines the estimated life for different types of equipment. We are proposing to purchase a sidewalk plow (\$143,528) and a Fire Pumper Truck (\$625,634). The Rolling Stock plan includes taking out a \$150,000 note to cover the cost of the Pumper.
- **49100.040** Transfer for Building Maintenance no increase or decrease. In FYE17 the Trustees started setting aside funds for the Maintenance of our historical buildings. This budget proposes to continue that transfer.
- Fund budget from sustaining a large hit in the year an employee retires.

 Employees are paid for accumulated vacation time (up to 240 hours), comp time (up to 200 hours if hourly employee) and a portion of accumulated sick time (could be up to 800 hours). The Village General Fund had liability of \$290,138 at 6/30/16 for accrued benefits. At the end of FYE16 this reserve contains \$81,965. Staff feels it is important to continue funding this reserve as a number of our employees are nearing retirement age.
- 49101.031 Half Penny for Ladder Truck Note (-\$50,000) The Ladder Truck purchase in FYE13 was funded by \$250,000 already set aside by the Village in prior years, \$300,000 from the Town of Essex over a 4 year period and a 5 year note for \$250,000. The note will be paid back by an additional ½ Penny (\$50,000) transfer from the General Fund to the Rolling Stock Fund over 5 years. The last year of the payment is FYE18. The last year scheduled for this transfer was FYE17.

Debt Service - \$210,422

Represents an overall decrease of \$11,822 or -5.3%% over the FYE17 Budget

Acct # Description

- **47116.000** Capital Improvements Principal (-\$6,600) It was originally estimated that General Fund would pay 86% of the Bond Principal of \$165,000 and Water Fund would pay the other 14%. All of the bond money has been received as of 12/01/16. A preliminary reconciliation of bond expenditures shows that 18% of the Bond was used in the Water Fund and 82% in the General Fund. A final reconciliation may change this number slightly.
- **47216.000** Capital Improvements Interest (-\$5,222) General Fund pays 82% of the Bond Interest of \$91,611. The interest payment in FYE18 is \$75,122. This amount will gradually decrease over the life of the bond.

ECONOMIC DEVELOPMENT/COMMUNITY EVENTS - \$92,905

Represents an overall increase of \$884 or 1% from the FYE17 Budget.

Line items of significant change in this budget are detailed below:

| Acct# | Description |
|-----------|---|
| 41335.130 | Salaries – Regular – (+ $$1,528$) The current 30 hr position will become Communications Officer for the Village and Town in the proposed budget. |
| 41335.130 | Salaries – Part-time – (- $$900$) Salary for the Farmer's Market Manager is paid for out of this line item. |
| 41335.811 | Annual Support of Organizations – (-\$1,600) The reduction represents the elimination of our payment to Essex Rescue. This contribution is now covered by the Town contribution. |
| 41335.891 | Capital Outlay -No Capital Outlay purchases proposed this fiscal year. |

ADMINISTRATION BUDGET - \$503,502

Represents an overall decrease of \$99,629 or -16.5%

There are three major changes affecting the proposed Administration Budget for FYE18. These changes are:

The transfer of salary and benefits for the Finance Director to the Town of Essex budget. The assumption of most of the Village computer network expenses by the Town of Essex. The addition of \$17,000 for the recruitment of a new Municipal Manager

Areas of significant change to the Administration Budget are as follows:

Acct # Description

- 41320.110-250 Salaries and benefits (-\$104,165) The decrease in salaries and benefits is due to the proposed transfer of the Village/Town Finance Director salaries and benefits to the Town of Essex budget. It is proposed that the Village Enterprise funds will pay 20% of this salary and benefits and that the Town Water/Sewer fund would also pay 20% of this salary.
- 41320.330 Other Professional Services (+\$15,000) The dollars added to this line item are for half of the cost to hire a consultant to help in the Municipal Manager search. An equal amount has been proposed in the Town Budget.
- 41320.340 Computer Expenses (-\$9,000) We are proposing to have the Town IT department provide network server and support to the Village. Support for 3 remaining accounting programs and support for our e-mail anti-spam program remain in the Village budget
- 41320.530 Communications (+\$2,361) The hosting of the Heart and Soul Community Calendar has been passed on to the Village of Essex Junction. The Village proposes to have our webhost (Ecopixel) develop a calendar for the Village with more applicability than the Heart and Soul calendar. We have also added money to pay for the RSS feed developed in FYE17.
- 41320.571 Pay and Classification Study (+\$5,847) As part of the Village Association contract the Village agrees to review the Village pay ranges every other year. This study is in the budget for FYE18 and was not not needed in FYE17. This money is budgeted for an outside study of Village wages & classifications in comparison with current trends.
- **41320.891** Capital Outlay (-\$3,000) There is nothing budgeted in this line item in FYE18.

LINCOLN HALL BUDGET - \$52,418

Represents an overall increase of \$3,268 or 7%

Acct # Description

- **41940.550 Printing** (-\$300) This was the cost for the Senior Center to make copies on the Administration copier. They now have their own copier.
- 41940.891 Capital Outlay (+\$2,200) Funds are for hallway and meeting room carpet.

Brownell Library's proposed FY18 budget includes the following increases:

An increase in contract services (45551.423) to increase frequency of polishing of community and restrooms floors to 4 times/year for better maintenance; carpet cleaning to twice/year to follow minimal cleaning recommendations of new carpet manufacturer's recommended cleaning service, and a seasonal mat service to help prevent snow and salt damage to the new Library carpet.

An increase in Maintenance – Buildings/Grounds (45551.434) to reflect increased costs of contract services (HVAC, and sprinkler, fire and panic button systems).

An increase in Training, Conferences and Dues (45551.500) to allow some staff to attend the New England Library Conference which is being held in Burlington, VT in October 2017.

An increase in Technology Access (45551.530) to reflect the expense of the Core Collection database (a key collection development tool) that Brownell is sharing with Essex Free Library.

An increase in Volunteer Expenses (45551.574) to help assist further with volunteer appreciation costs.

An increase in Adult (45551.640) and Juvenile (45551.641) Collections to continue to bring back up these budget lines after a significant reduction in FY12.

An increase in Adult (45551.836) and Childrens' (45551.837) Programs to assist in expanding excellent program offerings and the supplies needed to offer programs.

A Capital Outlay (45551.891) request for recovering the main stairwell with rubber treads and tiles for more durability as the carpet is very frayed at the edges and on the verge of splitting in several areas.

SUBJECT:

Budget Transmittal

The Essex Junction Fire Department has completed our proposed budget for FY18. We are requesting an increase of 3.0% for FY18.

The proposed increase leaves us with approximately \$9,000 to distribute across budget line items. Our salaries have increased by \$6,000 to continue our base hourly rate increase. We currently pay individuals \$11.00/hr. with a minimum of 2 hrs./call. My goal is to continue to increase our base rate by \$.50/hr. every six months, provided our budget is not negatively impacted. The target is \$15/hr. as a base rate for new firefighters.

Vehicle Maintenance is being increased by \$3,000 as annual costs are approaching or exceeding \$20,000.00. Vehicle Maintenance continues to be a challenge and our plan is to offset any overruns with reduced fuel prices that we continue to enjoy today and hope they continue through FY18.

All other adjustments made were to move existing funds to more accurately reflect the budget line items where spending is incurred.

We deliver a vital service to our community at a very reasonable cost. Our plan is to maintain a paid call service, while providing individuals who serve, with the best equipment to perform fire protection and emergency medical service when called upon.

I look forward to discussing our proposed budget with you later this year.

Village budget notes:

1) Under equipment rentals

"the average expenditure over the last four years was \$3,717. With the new GPS units on vehicles, there is an added \$3,360 in annual costs. Although the plan is to purchase a new sidewalk plow in FYE18, short term rental of auxiliary sidewalk plowing equipment is still anticipated at an estimated cost of \$2,000."

2. Under Rubbish Removal

"Use of a vendor to assist the village crews in Christmas Tree pick-up is estimated to cost \$800. Historically, the Chittenden Solid Waste District has reimbursed the Village for these costs. The budget does not include costs for the Christmas tree pick-up based on the assumption of CSWD repayment."

3. Supplies

"The high cost in FYE16 was due to the purchase of supplies to replenish stockpiles and do other winter work made possible through low snowfall and reduced winter salt expenditures and overtime. Items purchased included plow blades, brooms for the sweeper, a new i-pad for the Crew Leader, nuts and bolts, and a new computer."

4. Gravel and topsoil

"The increase reflects actual expenditures in FYE16 and the need for added materials to help address erosion issues, around bridges and culverts, and for general road repair materials."

5. Signs and Posts

"The high cost in FYE16 was due to the replacement of many older signs during the winter due to low snowfall and the opportunity savings from lower salt and overtime costs"

6. Contractual Services

"Costs were lower in FY16 mainly due to the milder winter conditions and lack of significant snowfall. There is currently still one vacancy in the water department that has proven difficult to fill. It is anticipated that winters will not be as mild as in FYE16 and that added winter contractor services maybe required. The anticipated costs are likely to be in the range of costs in FYE15 and FYE16.

7. Storm sewer maintenance

"In addition to the routine storm water system maintenance costs incurred annually that have averaged \$16,500 over the past four years, three specific projects were investigated based on complaints/requests for service from residents. These projects are at storm pipe outfalls, where erosion is continuing. Estimates have been developed for these repairs. While some work can be done by Village employees, the work will involve specialized equipment and some

vendor costs. These projects are estimated at \$22,000. The budget request is for \$30,000 to cover these projects and approximately 50% of the normal budget expenditures."

Capital Reserve Plan FYE18 - \$3,516,773

The Capital Committee has prioritized numerous infrastructure projects over the past few years using a matrix. 5 projects are being paid for over 3 years with a \$3.3 Million bond. The projects proposed for FYE18 to be funded through the Capital Reserve Fund are:

| Hillcrest Sidewalk Peart to Fleming | \$449,394 |
|--|-------------|
| Main St. Pedestrian Bridge replacement | \$263,875 |
| Greenwood Ave. Drainage | \$41,026 |
| Crescent Connector | \$2,762,478 |
| Total | \$3,516,773 |

This plan assumes the Pearl St. Missing Link will be completed in FYE17. If not, those costs and grant reimbursements will extend into FYE18 instead of being done in FYE17.

After an assessment by the State of Vermont determined that the Pedestrian Bridge was failing, the project was brought to the Capital Committee where it was ranked. It scored higher than other projects on the list and so was moved to the front. We also expect to be able to receive \$175,000 from the State of Vermont in the form of a Structures Grant to help fund this project.

The Transfer in from the General Fund this year is proposed to be \$295,582 – an increase of 7.5%.

Rolling Stock Fund FYE18 - \$769,163 Vehicles proposed for replacement in FYE18 are:

Street Department 2008 Belos Sidewalk Plow - \$143,528 Fire Department 1997 E-One Pumper - \$625,634

The transfer in to the Rolling Stock Fund from the General fund in FYE18 is proposed to be \$213,624. This is an increase of \$10,000 or 5.% from FYE17.

MINUTES SUBJECT TO CORRECTION BY THE ESSEX JUNCTION CAPITAL PROGRAM REVIEW COMMITTEE. CHANGES, IF ANY, WILL BE RECORDED IN THE MINUTES OF THE NEXT MEETING OF THE COMMITTEE

VILLAGE OF ESSEX JUNCTION CAPITAL PROGRAM REVIEW COMMITTEE MINUTES OF MEETING December 6, 2016

MEMBERS PRESENT: Andrew Brown (Chairman); Rick Hamlin, Kevin Collins,

Amber Thibeault, Tim Dall.

ADMINISTRATION:

Lauren Morrisseau, Finance Director & Assistant Manager.

OTHERS PRESENT:

None.

CALL TO ORDER 1.

Chairman Andrew Brown called the meeting to order at 6 PM.

2. **AGENDA**

MOTION by Amber Thibeault, SECOND by Rick Hamlin, to approve the agenda with the addition of Item 4.5 - Ranking Main Street pedestrian/bike bridge project. **VOTING:** unanimous (5-0); motion carried.

3. PUBLIC COMMENTS

None.

4. LETTER FROM VTRANS re: MAIN STREET BRIDGE

Tim Dall reported the condition of the pedestrian bridge on Main Street is very poor. In place now are two steel beams decked with pressure treated lumber and cold patch for ramps. Chain link fence is up for protection from falling off the bridge. Rick Hamlin added the repair is temporary. The project includes removal of the old bridge and building a new self-supporting, separate pedestrian bridge adjacent to the vehicle bridge. Grant money is available for the repair/replacement (possibly up to a 90:10 match).

4.5 RANKING MAIN STREET PEDESTRIAN BRIDGE - JJJ

JJJ - Main Street Pedestrian Bridge (town office side of Main Street)

Mr. Dall recused himself from ranking the project due to potential conflict of interest with being hired to evaluate the condition of the bridge.

Project consists of removing existing pedestrian bridge and building a self-supporting. separate pedestrian bridge adjacent to the vehicle bridge on the town office side of Main Street. Evaluation done in 2016. Ranking: 86.

Rick Hamlin will forward the capital estimate for JJJ. Andrew Brown will update the spreadsheet to include the project and ranking.

5. RE-RANK OUTSTANDING PROJECTS

BB – Rosewood Lane

Project consists of replacing sidewalk on the south side of Rosewood Lane from Mansfield Avenue to Briar Lane and removing the sidewalk on the north side of the street. Original project estimate done in 2001. Revised ranking: 37 (former ranking 41).

CC – South Street

Project consists of replacing water line and sidewalk on South Street from Park Street to Doon Way. At least three hydrants need to be installed. Original project estimate done in 2001. Revised ranking: 42 (former ranking 33).

UU - Pearl Street

Project consists of bike lane and sidewalk and road from West Street to Susie Wilson Road. Original project estimate done in 2009. Revised ranking: 51 (former ranking 55).

Top ranking projects:

- Main Street pedestrian bridge JJJ (ranking: 86)
 - Hillcrest sidewalk DDD (ranking: 59)
- Railroad Avenue waterline Y (ranking: 59)
- Greenwood Avenue drainage EEE (ranking: 56)
- West Street Extension intersection BBB (ranking: 55)
- South Street drainage GGG (ranking: 54)

6. APPROVE MINUTES

October 4, 2016

MOTION by Rick Hamlin, SECOND by Kevin Collins, to approve the 10/4/16 minutes as written. VOTING: unanimous (5-0); motion carried.

November 1, 2016

MOTION by Rick Hamlin, SECOND by Kevin Collins, to approve the 11/1/16 minutes with the following correction(s)/clarification(s):

- Page 1, Re-Ranking, 2nd paragraph add "Consensus was reached to continue re-ranking projects alphabetically using project letter designation.";
- Page 1, Re-ranking, Orchard Terrace (U2) short length correct the revised ranking to 33;
- Page 1, Re-ranking, Pearl Street (V), 1st sentence change "Both projects" to "Project".

VOTING: unanimous (5-0); motion carried.

7. NEXT MEETING/AGENDA

Next meeting: January 3, 2017 at 6 PM

Agenda: Continue Re-Ranking Projects as Needed

8. ADJOURNMENT

ESSEX JUNCTION CAPITAL PROGRAM REVIEW COMMITTEE December 6, 2016

PAGE 3

MOTION by Rick Hamlin, SECOND by Tim Dall, to adjourn the meeting. VOTING: unanimous (5-0); motion carried.

The meeting was adjourned at 7:25 PM.

RScty: MERiordan

MEMORANDUM

TO:

Village Trustees

FROM:

Patrick Scheidel, Village Manager

DATE:

December 20, 2016

SUBJECT:

FYE18 Enterprise Funds Budget Transmittal

PROPOSED FYE18 BUDGET- SUMMARY OF ISSUES

ENTERPRISE FUNDS

The proposed FYE18 Water Fund Operating Budget shows a decrease of 1% over the FYE17 Operating Budget when Global Foundries is taken into consideration. However the operating budget for which Village rate payers are responsible is increasing by \$67,490 or 7%. The major reasons for this increase are an increase in the Capital Reserve transfer and an increase in water wholesale cost.

The proposed FYE18 Wastewater Treatment Fund budget is increasing by \$76,792 or 4.3. A substantial amount of this increase is made up of increases in Liability and Property Insurance, Grit Disposal, Chemicals and Capital Reserve Contribution.

The proposed FYE17 Sanitation Fund Operating Budget shows an increase of 1.1% from the FYE17 budget. Line items contributing to this increase are Salaries and Benefits and Pump Station Maintenance.

The overall rate increase for Water/WWTF/Sanitation is estimated at this time to be 2%. The estimated Water rate reflects an increase of 9%, WWTF a decrease of 5% and Sanitation an increase of 2%.

Budget Challenges

Keeping abreast of changing regulations and requirements is always a challenge for the Wastewater Treatment Facility.

Estimating water flows for purchase as well as billing is a challenge due to water breaks and change in water use.

Wastewater Treatment Facility Refurbishment Bond Payment

In FYE16 141,000 was added to the revenue to be collected in the Sanitation Fund when the rate was calculated. We are planning to add \$10,000 to this amount each year. The sale of excess capacity to Williston has tempered the amount we need to collect from our rate payers

Proposed FYE17 Budget- Summary of Issues

Water Breaks.

Major water breaks were found on Upper Main St. and Rosewood Lane. Along with the new lines on School St. and Maple St. these repairs should curb our unaccounted water amount.

Water Meters

Our water meter switchover to radio frequency transmitters is continuing to move forward. In the last year many of the large meters were replaced with new e-coder meters that transmit readings by radio frequency. The new meters are more accurate and allow public works employees to obtain information about a property's water use. The datallogs from these meters can pinpoint when and how much water went through a meter which can help a customer figure out why they have a high bill. The costs for the meters are shared between the Water Fund and the Sanitation Fund as usage charges are currently based on metered water. It is now estimated this project will be completed in FYE19.

WATER FUND BUDGET - \$3,785,715

Represents an overall decrease of \$22,893 or -1%

The proposed FYE18 Water Fund Operating Budget shows a decrease of 1% over the FYE17 Operating Budget when Global Foundries is taken into consideration. However the operating budget for which Village rate payers are responsible is increasing by \$67,490 or 7%. The major reasons for this increase are an increase in the Capital Reserve transfer and an increase in water wholesale cost. See explanations below.

Costs for water for a household using 120 gallons a day are estimated to increase 9% - from \$182.33 to \$198.64 per year.

Acct # Description

- **43200.411 CWD Water Purchase** (+\$33,510) The average amount the Village has purchased in the last three years has increased and the CWD rate is going up at least 3%. Hopefully the work done on leaking lines will cause this amount to
- **750.020** Capital Reserve Fund Contribution (+\$20,000) In order to fund the infrastructure and equipment needs of the Water Fund, this line item is projected to increase by \$20,000 each year. The Capital Reserve has some major projects in the near future.

FYE17 Water Fund Capital Reserve Fund Proposed Projects

Projects proposed for FYE17 in the Water Fund Capital are listed below.

Water meter upgrades to Radio Reads - \$25,787 – This will be the 8th year in this project. Water Fund staff has revised the anticipated completion date of this project to FY19. It has not progressed as fast as was once projected. At this point in time 63% of meters in the Village have been upgraded to Radio Reads.

Bond Payment – 18% of the bond payment for infrastructure projects is now allocated to the Water Fund. The is an increase from the original estimate of 14%- \$46,190 **Total Amount for FYE18 Water Capital Reserve - \$71,977**

The Water Capital Reserve has been aligned with the General Fund Projects where projects have both roadway and water line components.

Wastewater Treatment Expenses - \$1,859,996

Budget represents an overall increase of \$76,792

The proposed budget is increasing mainly due to insurance premium increases.

Wastewater facility operations are now generally normalized since completion of the 2014 capital improvements. This budget represents costs experienced based on actual expenses as well as fair consideration of offsetting revenues for solar and Co-Generation electric and heat savings. System operations continue to be optimized for efficiency and for pending Phosphorus permit conditions required under the Lake Champlain Total Maximum Load permit requirements

Village user costs for wastewater treatment with a typical user estimated at 120 gallons per day are estimated to decrease by 5% from \$151.97 to \$143.62 per year. The decreased rate is due to the decreasing budget impact on the Village users and reduction of the Village portion of the facility allocated flow. (Overall facility costs are allocated to each participating community based on total flow to the facility.) With the anticipated decrease in user rate, WWTF Staff recommend setting a level Village user rate to stave off any future increases. WWTF staff supports rate reduction when a longer term trend in decreasing rates is indicated.

43200.140 Salaries Part Time: (+\$1,861) The facility is in transition with the planned retirement of one staff member and planned training of a new hire. Additional part time help will aid in this transition with general maintenance tasks allowing staff to focus on training and implementation of difficult maintenance and process tasks.

43200.521 Liability & Property Insurance: (+\$14,207) This is the first year where full insurance charges show for the added value of construction completed in August 2014

43200.565 Grit Disposal: (+\$6,000) Operations switched to a contract hauling that picks up grit and other waste twice weekly. This also aids in reduction of odors and flies on site. The cost is comparable to that of purchasing a new dump trailer and staff time for weekly disposal. This line item also includes cost to clean out sludge drying beds that we periodically use at another local facility.

43200.569 WWTF Annual Permit Fee: (+2,400) Increased to reflect change in fee schedule and rate for wastewater facility permits. 3,300,000 gallons per day capacity @\$0.003/gallon annually. This change is both an increase in the rate and a switch from gallons per day flow to gallons per day capacity.

43200.570 Maintenance Other: (+\$5,000) Since the completion of major maintenance work in 2014, this line item has been used for purchase of spare parts etc. that were not included in the work or were not considered earlier. The increase shown is in the budget amount, which shows a reduction versus prior actual expenditures.

43200.610 Uniforms, Boots, etc.: (-\$1,000) Adjusted down to reflect actual spending patterns.

43200.618 Supplies – **Laboratory:** (+\$2,000) Changes reflect increases in testing and chemical reagent costs, transfer of Quality Control compliance costs from the state to the facility, as well as increased process and stormwater testing. Stormwater testing included bacterial and phosphorus testing for the TriTown communities. The relative cost of this stormwater testing is minimal but noted here.

43200.619 Chemicals: (+\$15,000) The biological nutrient removal process is working well to reduce costs of chemical used for Phosphorus removal. This efficiency is offset by increased chemical use for alkalinity control as well as odor control from two major collection system service areas. Odors are increased due to a reduced flow trend which also results in increased pollution loading which leads to increased odor generation. Odors have been particularly challenging in applying the correct combination of materials applied to resolve the problem.

43200.626 Gas, Grease and Oil: (-\$1,500) Reduction shown is based on actual consumption. No substantial increase in fuel prices are anticipated by this budget.

43200.742 Contribution to WWTF Cap Reserve: (+\$20,000) Increased annually as appropriate by the TriTown Committee and Village Trustees in. Future charges to this account will be adjusted as warranted by a pending 20 year capital planning process.

Wastewater Treatment Revenues 255.

Revenues are projected based on an annual volume of 640 Million Gallons per year total flow through the facility. These flows are apportioned to each participating community based on flows reported by each community. Any significant variances are reconciled at the end of each Fiscal Year.

Other revenues include septage and leachate charges levied to companies registered for disposal at the facility. These revenues are split 33% to cover treatment costs incurred for the material. 67% is returned to the Village as this capacity for treatment used belongs to the Village of Essex Junction.

Wastewater Capital Reserve

The Wastewater Capital Reserve project planned for FYE18 is the purchase of a Front End Loader for \$60,000.

We are also requesting to add the following project to the FYE17 Capital Plan:

Alkalinity Addition Project: The new process shows a need for regular alkalinity addition of 50% Sodium Hydroxide(Caustic Soda Solution) to increase process water pH to maintain permit compliance. This was not anticipated as a need in the original design. We are currently managing the situation by seasonally sharing another important process chemical tank. Long term continuation of this sharing is a safety and process control concern. The project will provide necessary improvements for safe and reliable addition of the Sodium Hydroxide to the process.

VILLAGE OF ESSEX JUNCTION WATER RESOURCE RECOVERY FACILTY

ALKALINITY AND DISINFECTION UPGRADES FEASIBILITY STUDY

July 2016

1.0 OPERATING DATA

Detailed information for the 2015 operating data was provided by the Village for review. Only those operating parameters related to the pH, alkalinity and disinfection were reviewed.

For 2015, the average flow was 1.72 mgd and will be used as the baseline to assess the current operating conditions and evaluate the supplemental alkalinity and disinfection alternatives.

2.0 SUPPLEMENTAL ALKALINITY

The influent pH averages about 7.64 SU which is sufficient, but when nitrification occurs and removes ammonia, the pH is depressed. This facility was not designed to denitrify, but when nitrification occurs, alkalinity can be recovered to maintain a higher pH at the aeration tank effluent. For the aeration tank effluent in 2015, the pH averages about 6.5 SU and ranges from 5.8 to 7.0 SU.

When the pH approaches 6.5 SU, addition of supplemental alkalinity is required to increase the pH. In 2015, lime (sodium bicarbonate) and sodium hydroxide were added to maintain compliance of pH with the lower permit limit of 6.5 SU as follows:

- For the sodium bicarbonate, approximately 5,800 lbs of lime were added at an average of 232 lbs per day. Addition of lime from 50 lb bags at the aeration tanks is challenging because it is dusty and very labor intensive.
- For the sodium hydroxide, a total of 8,703 gallons was added. When added, an average of 45 gallons per day was required.

In 2015, the increased chemical cost of the supplemental alkalinity was about \$19,600 as summarized in Table 1. This dosage of Sodium Hydroxide was started about May 1 and continued through November 10, 2015.

Table 1
Supplemental Alkalinity

| Quantity | Estimated Cost |
|---------------|----------------------------|
| 5,800 lbs | \$2,300 |
| 8,703 gallons | \$17,300 |
| Total | \$19,600 |
| | 5,800 lbs 8,703 gallons |

Notes:

- 1. Sodium bicarbonate at \$19.74/50 lb bag.
- Sodium hydroxide bulk at \$1.984 per gallon.

3.0 DISINFECTION

In 2015, approximately 27,445 gallons of sodium hypochlorite were added for chlorination. On average, about 75.4 gpd were added and the daily usage ranged from 25 to 318 gpd. For dechlorination, about 15,377 gallons of sodium bisulfite were added. On average, about 42.2 gpd was added and the daily usage from 21 to 75 gpd. In both cases, the dosages are a bit higher than typical design values but is necessary to maintain consistent compliance with the permit limits.

In 2015, approximately \$46,300 was spent on both chemicals to operate the disinfection system as summarized in Table 2.

Table 2
Disinfection Chemicals

| Chemical | Quantity | Operating Cost |
|---------------------|----------------|-------------------|
| Sodium Hypochlorite | 27,445 gallons | \$23,246 |
| Sodium Bisulfite | 15,377 gallons | \$23,066 |
| | Total | \$46,312 |

Notes:

- 1. Sodium hypochlorite bulk at \$0.847 per gallon.
- 2. Sodium bisulfite bulk at \$1.50 per gallon.

4.0 DISINFECTION ALTERNATIVES

4.1 Types of Disinfection

A screening of disinfection alternatives was performed and included the following methods:

- Chlorination/Dechlorination
- Chlorine Dioxide
- Ultraviolet Disinfection
- Ozone Disinfection

Comparisons can be performed of these options, but the liquid chlorination/dechlorination is the current process being used. Ozone disinfection is very uncommon, and is only used on a case by case basis, so it wasn't considered further. Ultraviolet disinfection is a very common approach for new facilities, and was discussed during the recent upgrade. However, it was not included in the project due to concerns about the significant increase in operating costs for electricity and bulb replacements.

Other options to be considered are the use of peracetic acid (PAA) as a substitute for sodium hypochlorite, and will be discussed further.

4.2 Paracetic Acid (PAA)

4.2.1 Description

The use of paracetic acid for wastewater disinfection has been commonly used in Europe for many years, but is relatively new to North America. Case studies have been performed for facilities in Steubinville, Ohio and St. Augustine, Florida.

The primary supplier is Solvay Chemicals, but it is available through Surpass Chemical Co. located in Albany, NY. Since the use isn't as widespread for municipal applications, the chemical costs can be high do a lack of availability.

4.2.2 Design Criteria

Mention of paracetic acid as a substitute to sodium hypochlorite is not discussed in many of the typical wastewater design manuals but a literature research indicates that the product is typically used at a 15% solution. A typical dosage for paracetic acid is 1.5 ppm, and maintains a residual of about 0.4 ppm.

4.2.3 Technical Analysis

Advantages

- Long shelf life
- Rapid and effective disinfection
- Does not generate harmful disinfection by products

Disadvantages

- Can increase organic content
- High chemical cost due to limited production

4.2.4 Conclusions

Very good results have been achieved at municipal wastewater treatment facilities in the United States that rely on PAA as the primary disinfection method. The advantage of using the PAA is

that only one chemical must be added and this could free up space in the Chemical Feed Building for bulk storage of Sodium Hydroxide. However, conversion from chlorine will be difficult for this Essex Junction facility as the State doesn't currently recognize this as an acceptable method of disinfection for wastewater. Estimated costs for the PAA chemical purchase based on the 2015 operating data are about \$80,000, a significant increase over the current chemical used. To receive approval to implement this approach, extensive pilot testing would be necessary and it likely that the existing chlorine system would need to remain operable as a back-up.

5.0 ALKALINITY STORAGE ALTERNATIVES

For the addition of sodium hydroxide as supplemental alkalinity, the following alternatives were evaluated for a more permanent storage and feed system.

#1: Chemical Feed Building Modifications

#2: New Chemical Feed Building Addition

#3: Exterior Chemical Feed System

5.1 Alternative #1 - Chemical Feed Building Modifications

5.1.1 Description

This alternative is based on reuse of the existing chemical storage space in the Chemical Feed Building. In the containment area that contains the Sodium Bisulfite storage tanks, there are (2) 3,000 gallon polyethylene storage tanks. Based on the typical usage for the Sodium Bisulfite, the space for one of these tanks would be converted to bulk storage for Sodium Hydroxide.

A new concrete wall or partition could be constructed to separate the chemicals to provide 4,400 gallons of bulk storage. Refer to the sketch provided in Attachment No. 1. This new tank would require a separate fill line, vent line, and suction line to provide isolation from the Sodium Bisulfite tank. A new chemical feed pump for the Sodium Hydroxide can be provided on an adjacent shelf.

Reuse of the sodium aluminate sleeve and a feed line would be required to convey the chemical to the downstream end of the Aeration Tanks.

A new chemical feed line would need to be extended to the upstream end of the Aeration Tanks as this is the primary dosage point. A PVC sleeve can be fastened along the walkway containing multiple feed lines.

5.1.2 Technical Analysis

Advantages

- Allows for reuse of existing space.
- Provides for addition of the Sodium Hydroxide at the downstream or upstream end of the Aeration Tanks.
- Chemical storage and feed is indoors in a heated/ventilated space for ease of operations.

Disadvantages

- Requires split of the 2 chemicals to provide separate containment as there can be a reaction between the two chemicals if they come into contact and are mixed.
- Reduces the bulk storage volume of the Sodium Bisulfite from 6,000 to 3,000 gallons.
- Extension of the chemical feed line to the aeration tanks is required.
- A long chemical feed line is required to the primary dose point requiring feed water using process water.
- Limited operation during colder weather conditions to prevent freezing of the exposed feed line across the aeration tanks,

5.2 Alternative #2 – New Chemical Feed Building Addition

5.2.1 Description

This approach is based on construction of a new chemical feed addition adjacent to the southwesterly elevation of the Operations Building. Refer to the sketch in Attachment No. 1. This addition would be approximately 14' X 24' (336 s.f.) with a similar finish floor elevation to adjacent garage at 248.0.

This new building addition will contain one (1) 4,400 gallon Sodium Hydroxide bulk storage tank with double containment and one (1) peristaltic feed pump. The bulk storage tank will include a vent line, fill line, and suction line. Information on the bulk storage tank is provided in Attachment No. 3.

Construction of a new chemical sleeve and feed lines is required from the building addition to primary dosage point at the upstream at the Aeration Tanks.

5.2.2 Technical Analysis

Advantages

- Allows for continued use of the two (2) 3,000 gallon bulk storage tanks for the Sodium Bisulfite.
- Provides space for one (1) new 4,400 gallon bulk storage tank for Sodium Hydroxide.
- Interior space for the chemical tank is provided with heat and ventilation.

Disadvantages

- Requires construction of a new chemical feed sleeve and feed lines to the primary dosage point at the upstream end of the Aeration Tanks.
- There are some existing utilities adjacent to the building addition that will need to be avoided and or relocated.

5.3 Alternative #3- Exterior Chemical Storage/Feed System

5.3.1 Description

This approach is based on addition of a new bulk storage tank located adjacent to the Aeration Tanks or closer to the Primary Clarifiers. One (1) bulk storage tank will provide 4,400 gallons of storage for Sodium Hydroxide. The tank will be provided with double containment, heat trace, and insulation suitable for outdoor use. Refer to the sketch in Attachment No. 1.

The tank is located adjacent to the primary dosage point and a chemical feed pump can be provided adjacent to the new tank.

5.3.2 Technical Analysis

Advantages

- Allows for continued use of the two (2) 3,000 gallon bulk storage tanks for the Sodium Bisulfite.
- Construction of a new building is not required.
- The chemical storage is provided at the primary dosage point providing reliable operations.

Disadvantages

- The storage tank is outside requiring heat trace and insulation suitable for seasonal usage.
- Extension of a new feed line along the Aeration Tanks would be required if addition of Sodium Hydroxide is required at the effluent channel.
- Extension of an electric service to the tank will be required for the heat trace and feed pump.
- Tank fill line is longer.

5.4 Estimated Costs

A summary of the estimated construction costs are provided in Table 3, and range from \$65,000 to \$180,000. The most expensive approach is Alternative #2, New Chemical Feed Building Addition, at \$180,000. Detailed breakdowns of the cost estimates are provided in Attachment No. 4.

Table 3
Alkalinity Storage Alternatives

| Us | \$95,000 | \$245,000 | \$130,000 | | | | | | |

Notes:

 Budgets for engineering shown above are based on the State FED engineering fee allowances for small projects.

6.0 NEXT STEPS

This feasibility study has been reviewed by the Village staff, and Alternative #1 or Alternative #3 are preferred to address the alkalinity storage and feed requirements. Alternative #1, Chemical Feed Modifications, is the least costly approach, but doesn't provide some of the long-term benefits as the other alternative, Exterior Chemical Storage.

For the next steps, the recommendation is to further evaluate both of these alternatives and select a preferred approach, then continue to the final design of the alkalinity improvements.

SANITATION FUND BUDGET - \$477,447

Represents an overall increase of \$5,263 or 1.1%

The proposed FYE18 Sanitation Fund Operating Budget shows an increase of 1.1% from the FYE17 budget. Line items contributing to this increase are Salaries and benefits and Pump Station Maintenance. The primary driver of an increase in the Sanitation rate is the increase in the amount of the WWTF bond payment. We are increasing this amount by 10,000 each year until we have the full payment funded in order to effect a gradual increase in rates rather than a one-time enormous increase. As Williston buys our capacity, the amount of increase from the rate payers decreases. The money received for the sale of capacity is deposited to the reserve in Sanitation Fund for WWTF upgrades.

Personnel costs (salaries and benefits) represent 36% of this budget.

Costs for sanitation for a household using 120 gallons a day are estimated to increase 2% - from \$123.42 to \$126.30 per year.

Acct # Description

- **43200.110** Salaries Regular (+\$4,050) More recently hired employees in this department are at the lower end of pay scale and so increases are higher percentage.
- **43200.434** Pump Station Maintenance (+\$2,000) Adjustments made to line item based on communications, new Old Colchester Rd. Pump Station ,and the addition of the Roscoe Ct. Pump Station.
- **750.020** Capital Reserve Fund Contribution (+\$0) We have not increased this line item this year as the Capital Reserve has been receiving a large amount in excess hook-on fees in the past few years.
- **755.023** Capital Outlay (-\$0) No equipment planned for purchase this year.

The Wastewater Treatment Facility serves 3 communities. Village-exclusive sewer related costs are paid for out of the Sanitation Fund.

.FYE17 Sanitation Fund Capital Reserve Fund Proposed Projects

Water meter upgrades to Radio Reads - \$51,756 This will be the 8th year of the project. Because the Wastewater Treatment Facility services 3 towns, we charge the Sanitation Fund for the sewer treatment portion of this cost. The same users pay for Sanitation as WWTF in the Village and the Sanitation costs are paid for strictly by Village residents.

Manhole Rehab/Sliplining - \$40,000
South St. Pump Station replace pumps engineering - \$2,500
Loan and Bond Payments - HS Pump Station Upgrade Loan Payment (\$73,200), ARRA Loan Payment (\$14,880)

Total Amount for FYE18 Capital Reserve - \$182,336
