14. *"Signs, Internally Illuminated"* shall mean signs where the source of the illumination is inside the sign and light emanates through the message of the sign. Signs which are filled with neon or other gas that glows shall be considered internally illuminated signs.
15. *"Sign, Off-Premises"* shall mean a sign that draws attention to or communicates information about a business, service, commodity, accommodation, attraction, or other enterprise or activity that exists or is conducted, sold, offered, maintained, or provided at a location other than the premises on which the sign is located. Signs which draw attention to causes or proclaim political, religious, or other non-commercial messages shall also be an off-premises sign.
16. *"Sign Permit"* shall mean a permit issued which authorizes the recipient to erect,

move, enlarge or alter a sign.

17. "*Sign, Permanent*" shall mean any sign as defined herein, permanently affixed to a building or the ground.

18. "*Sign, Portable*" shall mean a free-standing sign not permanently affixed, anchored or secured to the ground or structure on the lot it occupies, including trailered signs.

19. "*Sign, Projecting*" shall mean any sign which is attached to a building or other structure and which projects from the wall or roof surface of that portion of the building or structure to which the sign is attached.

20. "*Sign, Roof*" shall mean a sign on a roof that has a pitch of less than one-to-four. Signs on a roof with a pitch of greater than one-to-four shall be considered a wall sign.

If a sign display area is permanent but the message displayed is subject to periodic changes, that sign shall not be regarded as temporary

H. Stormwater Regulation Definitions. For the purposes of Section 713 of the Code, the following special definitions shall apply:

1. "*Alter*" shall mean any site activity that measurably changes the ability of the ground surface area to absorb water or will change existing surface drainage patterns. Alter may also be represented as the alteration of drainage characteristics or conducting any activity that disturbs the land.

2. "*Best Management Practices*" (*BMP*) shall mean any structural or non-structural site improvements that are recognized to be the most effective and practical means to prevent and/or reduce increases in stormwater volumes and flows, reduce point and non-point source pollution and promote stormwater quality improvement with protection to the environment. "*Structural*" *BMPs* are devices engineered and constructed to provide treatment and temporary storage of stormwater runoff. "*Non- Structural*" *BMPs* use natural measures involving site characteristics to reduce the volume of stormwater or eliminating the source of the pollutant. Non-structural *BMPs* do not require extensive construction effort in order to promote pollutant reduction.

3. "*Erosion and Sediment Control Plan*" shall mean a plan that indicates the specific measures and their sequencing for use to control sediment and erosion on a development site during and after construction.

4. "*Existing Development*" shall mean a development that was built prior to the effective date of the adoption of this Code.

5. "*Illicit Connection*" shall mean either of the following:

(a) Any drain or conveyance, whether on the surface or subsurface, which allows an illegal discharge to enter the storm drain system including, but not limited to, any conveyances which allow any non-storm water discharge including sewage,

process wastewater, and wash water to enter the storm drain system and any connections to the storm drain system from indoor drains and sinks, regardless of whether said drain or connection had been previously allowed, permitted, or approved by an authorized enforcement agency.

(b) Any drain or conveyance connected from a commercial or industrial land use to the storm drain system which has not been documented in plans, maps, or equivalent records and approved by an authorized state agency or by the Village of Essex Junction.

6. "*Illicit Discharge*" shall mean any direct or indirect non-stormwater discharge to the storm drain system, except as may be exempted under Section 713 of the Code.
7. "*Impervious Cover*" shall mean human-made surfaces including, but not limited to, paved and unpaved roads, parking areas, building roofs, driveways (paved and unpaved) walkways and compacted surfaces, including lawn areas compacted by heavy vehicle or pedestrian traffic, from which precipitation and run off rather than infiltrates. For purposes of this section, decks that allow water through to the ground below shall not be considered impervious cover. Pervious pavement designed per this Code and manufacturer's specifications for cold northeastern regions shall be acceptable and will not be exempt.
8. "*Infiltration*" shall mean the process through which stormwater runoff penetrates into soil from the ground surface.
9. "*Maintenance Agreement*" shall mean a legally recorded document that acts as a property deed restriction and provides for long-term maintenance of stormwater management practices.
10. "*MS4*" shall mean the Municipal Separate Storm Sewer System.
11. "*New Development*" shall mean the construction of new impervious surfaces on a tract or tracts of land occurring after the effective date of this Code.
12. "*Non-Stormwater Discharge*" shall mean any discharge to the storm drain system that is not composed entirely of storm water.
13. "*Pollutant*" shall mean anything which causes or contributes to pollution. Pollutants may include, but are not limited to: paints, varnishes, solvents; oil and other automotive fluids; non-hazardous liquid and solid wastes and yard wastes; refuse, rubbish, garbage, litter, or other discarded or abandoned objects, ordinances, and accumulations, so that same may cause or contribute to pollution; floatables; pesticides, herbicides, and fertilizers; hazardous substances and wastes; sewage, or other wastes containing fecal coliform and pathogens; dissolved and particulate metals; animal wastes; wastes and residues that result from constructing a building or structure; and noxious or offensive matter of any kind.
14. "*Redevelopment*" shall mean in the context of stormwater, any construction, alteration, or improvement exceeding ten thousand (10,000) square feet on previously developed land.
15. "*Riparian Buffer*" shall mean the width of land adjacent to lakes or streams between the top of the bank or top of slope for streams and the edge of allowed project activity. Riparian buffer zones are typically undisturbed areas consisting of trees, shrubs, groundcover plants, duff layer, and naturally vegetated uneven ground surfaces, that protect the water body, the shoreline and the adjacent riparian corridor ecosystem from the impact of land development. See Section 516 of this Code.
16. "*Runoff*" shall mean drainage or flood discharge that leaves an area as surface flow or as pipeline flow that has reached a channel or pipeline by either surface or sub-

surface routes.

17. "*Sediment*" shall mean soil, sand, and minerals washed from land into water, usually after rain. Sediment can destroy fish nesting areas, clog animal habitats, and cloud water so that sunlight does not reach aquatic plants.

18. "*Stormwater*" shall mean any surface flow, runoff, and drainage consisting entirely of water from any form of natural precipitation, and resulting from such precipitation.

19. "*Stormwater Management*" shall mean the use of structural or non-structural practices that are designed to reduce stormwater runoff pollutant loads, discharge volumes, and/or peak flow discharge rates.

20. "*Stormwater System*" shall mean storm sewers; outfall sewers; surface drains; natural and manmade wetlands; channels; ditches; wet and dry bottom basins; rain gardens; and other control equipment necessary and appurtenant to the collection, transportation, conveyance, pumping, treatment, disposal, and discharge of regulated stormwater runoff.

21. "*TMDL*" shall mean Total Maximum Daily Limit as established by the State of Vermont Water Quality Division for management and restoration of impaired waterways. TMDLs are contained within applicable impaired watersheds that have been determined to not meet water quality criteria under Section 303d of the Clean Water Act.

22. "*Vermont Stormwater Management Manual – Volumes I and II (as amended)*" shall mean the guidance manual referenced in this Code that includes regulatory requirements for the management of stormwater and technical guidance to assist in the design of stormwater treatment systems.

I. Riparian Buffer District Definitions. For the purposes of Section 516 of the Code, the following special definitions shall apply:

1. "*Riparian Buffer*" shall mean a vegetated area, including trees, shrubs and herbaceous vegetation, which exists or is established to protect a stream or wetland. Alteration of this natural area is strictly limited. The buffer setback is defined as the horizontal distance from a stream bank or channel, shoreline or wetland area, to the nearest part of a building, structure or impervious surface on the property.

2. "*Non-Point Source Pollution*" shall mean pollution which is generated by various land use activities rather than from an identifiable or discrete source, and is conveyed to waterways through natural processes, such as rainfall, stormwater runoff, or ground water seepage rather than direct discharge. This may include surface run off from individual sites or properties.

3. "*Stream*" shall mean the full length and width, including the bed and banks, of any moving watercourse including creeks, brooks, rivers, branches, and kills. A stream has a channel, whether natural or artificial, that periodically or continuously contains moving water, has a defined bed, and has banks that serve to confine water at low to moderate flows. Streams include intermittent streams that have a defined channel and evidence of sediment transport, even if such streams do not have surface water flow throughout the year and/or throughout the channel.

4. "*Stream Banks*" shall mean the physiographic features that normally contain streams within a channel. The bank is distinct from the streambed, which is normally wetted and provides a substrate that supports aquatic organisms.

5. "*Top of Bank*" shall mean the point along a streambank where an abrupt change in slope is evident, and where the stream is generally able to overflow the banks and enter

the adjacent floodplain during flows at or exceeding the average annual high water stage.

6. "*Top of Slope*" shall mean a break in slopes adjacent to steep-banked streams that have little or no floodplain.

7. "*Wetlands*" shall mean lands that are inundated or saturated by surface water or groundwater with a frequency sufficient to support significant vegetation or aquatic life that depend on saturated or seasonally saturated soil conditions for growth and reproduction. Such areas include but are not limited to: marshes, swamps, sloughs, potholes, river and lake overflows, mud flats, fens, bogs, and ponds. These areas are directly regulated under the State of Vermont and Federal regulations directly relating to wetland classification and delineation.
